## About DecisionBrain

We implement AI-driven, intelligent decision support solutions that allow organizations to reach operational excellence by improving their efficiency and competitiveness. Our solutions offer easy personalization to meet your unique needs, addressing challenges that standard packaged applications can't solve.

## Our Solutions

### Manufacturing and Supply Chain

**Over 30% efficiency gains against heuristic and manual plans**

- From long-term master planning to short-term detailed scheduling
- Synchronization with inbound and outbound logistics
- Tailored to each customer's needs across all manufacturing dimensions

Network Optimization | S&OP | Capacity Planning | Demand Planning & Forecasting | Inventory Planning | Production Planning & Scheduling

### Workforce and Maintenance

**20-30% productivity improvements through optimized operations**

- Strategic workforce design: optimized size, structure, and skill set
- Optimal tactical planning to maximize productivity & cope with seasonality
- Optimized real-time operational scheduling to minimize unproductive time

Workforce Capacity Planning & Territory Sizing | Workforce Planning | Workforce Scheduling & Dispatching | Asset Lifecycle Optimization | Maintenance Planning & Scheduling

### Logistics

**10-20% reduction in logistics costs via optimized routing & truck loading**

- Optimized inbound logistics just in time and just in sequence
- Optimal truck loading to minimize transportation fixed costs
- Multi-vessel quay and yard side planning for efficient port operations

Inbound & Outbound Logistics Optimization | Vehicle Routing & Scheduling | Load Building | Fleet Sizing & Structure

# DecisionBrain™

Smarter Decisions. Better Results.

## Our Customers

Our global customer base is made up of market leaders across various sectors, including automotive, semiconductors, facilities, field services, ports, aviation, and more. We have a strong track record of successful deployments around the world.

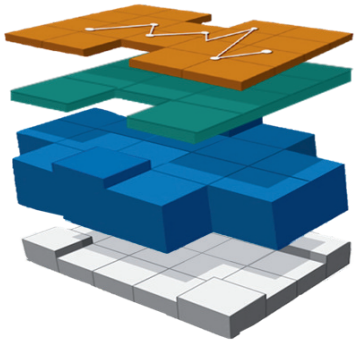
## What Sets Us Apart

- Tailored, agile-built solutions that match your unique operational needs
- Advanced expertise in optimization, machine learning, and AI
- Rapid delivery through our low-code technology platform
- Proven ROI across complex industries
- Unmatched support throughout the solution lifecycle

## Our Technology

Thanks to our low-code platform and a broad set of standardized components, we can easily model our customers' business logic and implement solutions tailored to their specific needs.

- Customer business knowledge
- Domain and industry knowledge
- Low-code platform
- AI, optimization and machine learning engines



- Flexibility to adapt to your needs
- Reduced time and risk of developing tailored solutions
- Alignment with your processes to simplify adoption
